NAACCR Combined ^a	44.2	0.08	43.8	0.08	48.5	0.30

^a Rates are based on 28 states and areas that meet the North American Association of Central Cancer Registries (NAACCR) standards of highest quality for 1993-1997 (SEER metropolitan areas within included states not duplicated in rates).

These states/areas cover approximately 51% of the US population.

^b Rates are per 100,000 and are age-adjusted to the 1970 US standard million population.

^c Rates are suppressed when incidence counts are fewer than 20 in five-year period.

^d Includes Greater Bay Area (CA), Los Angeles (CA), Atlanta metro (GA), Connecticut, Hawaii, Iowa, Detroit New Mexico, Utah, Seattle-Puget Sound (WA)
